-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first Office Action for application number 10/357,781, Quick Release Base and mounting Bracket for Napkin Dispenser, filed on. Claims 27-46 are pending.

Information Disclosure Statement

The information disclosure statement submitted on 1/28/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 27-46 are rejected under the judicially created doctrine of double patenting over claims 1-26 of U. S. Patent No. 6669162 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Claims correspond to the list below:

Application 10/713,954	Patent No. 669162
Claim 27	1
28	2
29	3
30	4
31	5
32	6
33	7
34	8
35	9
36	10
37	11
38	12
39	13
40	14
41	18
42	19
43	20
44	21
45	22
46	8

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Allowable Subject Matter

Art Unit: 3632

Claims 27-46 are allowed pending a proper filing of a terminal disclaimer.

The reason is that the prior art does not show a quick release base and bracket having a base with an upper surface and side walls extending downwardly therefrom defining a hollow cavity and a step locking process having an upper portion with a first recessed width and a lower portion with a second recessed width wherein the upper locking recessed width is smaller than the lower locking recessed width, and a plurality of projections disposed in the hollow cavity having a locking shoulder thereon each of which has a characteristic locking shoulder width, a mounting bracket having a means for securing to the countertop and a raised central locking surface provided with a moveable tongue, the tongue being provided with a step outer profile defining an outer width which is less than or equal to the upper recessed width of the base and a locking width which is greater than the upper recess width of the base, the locking surface being further provided with a plurality of locking slots with open portions having widths at least as great as the corresponding characteristic widths of the locking shoulders of the locking projections of the base/

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
